IMPORTANT SAFETY INSTRUCTIONS AND WARNINGS

WARNING!

RISK OF ELECTRICAL SHOCK!!!
DO NOT OPEN!!!
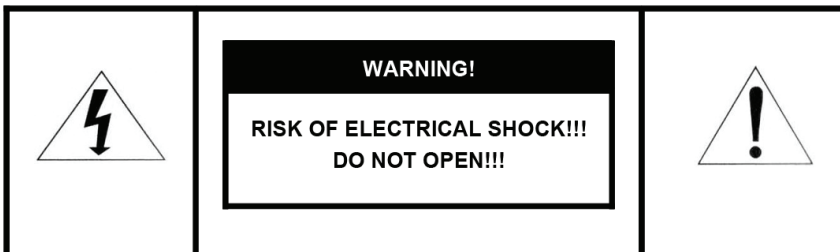

WARNING! To reduce the risk of fire or electric shock, do not expose the device to rain
or moisture.

- Read these instructions carefully!
- Follow these instructions!
- Mind all the warnings!

- Do not remove device covers as this may result in personal injury or mechanical damage. There are no userserviceable parts inside
- Position the cables so that they cannot be walked on or pinched by items placed on or against them
- Use only power cables provided in the box.
- Make sure that the voltage of your electricity supply is the same as that indicated on the rear of your set-top box
- Do not place it on soft or slippery surface.
- Do not place any objects on top of the set-top box or near it.
- Do not block any ventilation openings.
- Put the device in a properly ventilated area, away from direct sunlight or any source of heat.
- Do not install it near any electrical device.
- Do not expose the device to influence of magnetic field
- Protect it from chemicals, dust and humid environment.
- Unplug this set-top box during lightning storms
- Clean only with dry cloth while set-top box is powered off
- Do not use any detergent to clean it.
- Keep it away from the rooms with high humidity.
- Use only certified remote control batteries.
- Under any circumstances do not dispose of this product with your normal household waste.
- Refer all servicing to qualified service personnel only at your provider
- Your provider will not accept liability for any damage caused by not following these safety instructions and warnings

PROFILE STREAM SELECTION

By pressing ⬚ the button select stream quality or TV platform.

Markíza	High
Markíza	Medium
Markíza	Low

Stream quality

DVB-T
Multicast
OTT

TV platform

Both, stream quality and TV platform selection, depend on your television service provider.

INSTALLING THE REMOTE CONTROL BATTERIES

Insert 2 batteries into the remote control (type AAA 1,5 V – provided).

Remove the battery cover from the remote control and put 2 x AAA size batteries inside the compartment.
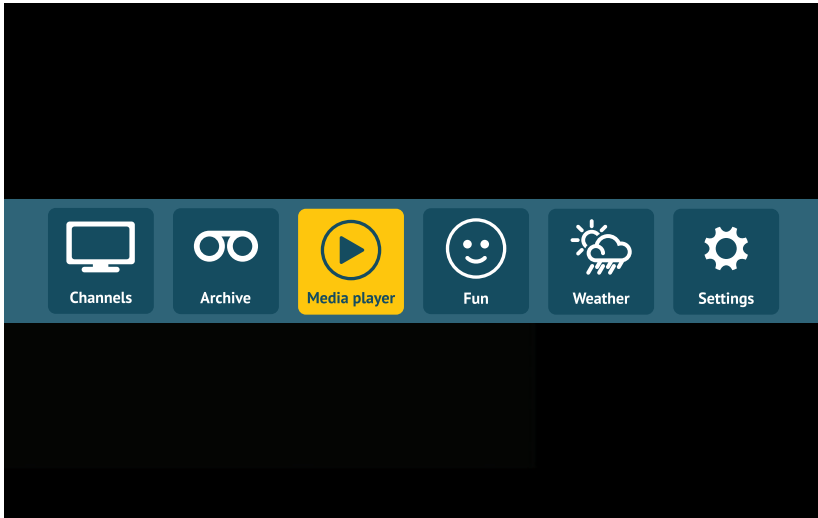

The diagram inside the battery compartment shows the correct way to install the batteries. Ensure you do not use batteries after date of expiration. (Danger of leakage)

Manufacturer is not responsible for the damage caused by incorrect installing the remote control batteries.

BASIC MENU

Use left / right arrows on remote control to navigate through Menu.

CHANNEL LIST

Use up / down arrows on remote control to navigate through Channel list channel by channel.
Use left / right arrows on remote control to skip through Channel list in 5 positions up or down. Radio list and Camera list works the same way.

T9 FILTER - Speed channel searching. By pressing the numeric buttons (associating with channel name) on remote control, find your famous channel at the instant.

For example: Find instantly SUN TV - Press button 7 (PQRS), button 8 (TUV) and button 6 (MNO) on remote control. By pressing the RED button on remote control, delete T9 filter in channel list.

Current time	EPG – Electronic Program Guide	Time remaining

Red Button – quick selection of DVB-T Menu

Next program

Green Button – display or exit Radio list

Blue Button – display or exit Channel Editor

Yellow Button – display or exit Camera list

CHANNEL EDITOR

Change order of the channels by selecting one of the arrows and confirm it by pressing the OK button on remote control.

Skip a channel. Mark it by pressing the OK button on remote control. All marked channels are transferred at the end of the order of Channel Editor where you can unmark them, too.
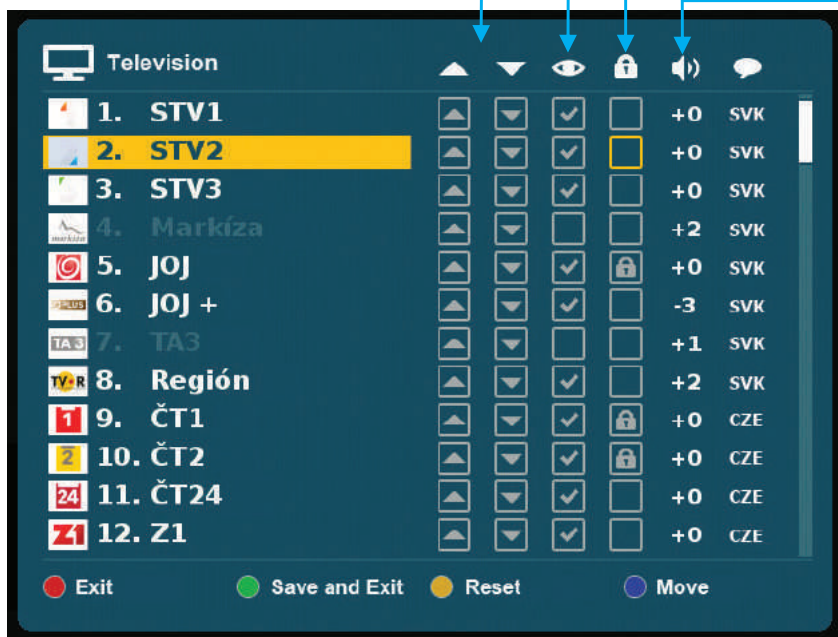

Parental Lock. Mark it by pressing the OK button on remote control. Such a marked channel is watchable only after entering a chosen parental password.

Individual adjustment of sound level for each channel. Press OK button to activate it and adjust it by left/right arrows on remote control.

Information about selected audio track or selected subtitles of the channel.
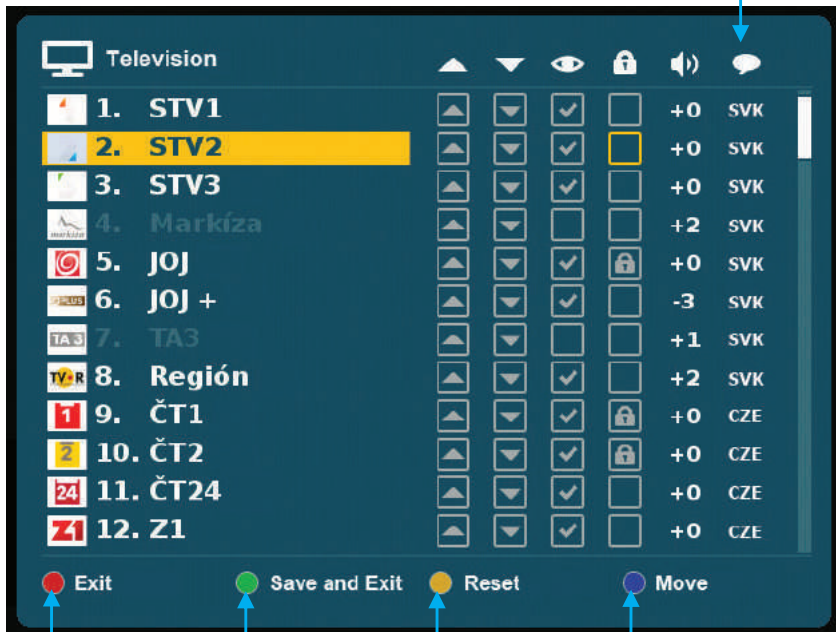

Exit the Channel Editor with no save

Saving of required changes in Channel Editor

Select the direct number of channel to move it in Channel order.

Restore of initial setting

HDMI-CEC - COMMON STB and TV TURN ON/OFF.

It provides controlling of turning on/off functionality via [icon] button on STB remote control.
To do that TV has to support HDMI-CEC functionality.

CEC - Consumer Electronic Control

How to do that:
1. Set up HDMI-CEC functionality (support) in TV menu (it can be named various names by various producers - for example Anynet (Samsung), Bravia Sync (SONY), Simplink (LG).)

2. Set up in STB menu - Other settings - HDMI-CEC settings - turn On/Off control - On.

CEC - HDMI SETTINGS
Turn ON/OFF control ◄ **ON** ►
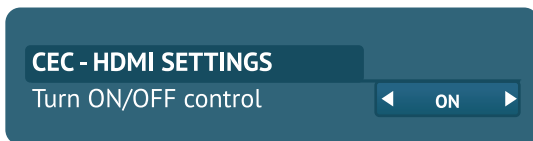

Following this procedure and pressing the [icon] button displays turn on/off possibilities with 5 seconds countdown.

Turn TV + STB OFF   5s
Turn STB OFF
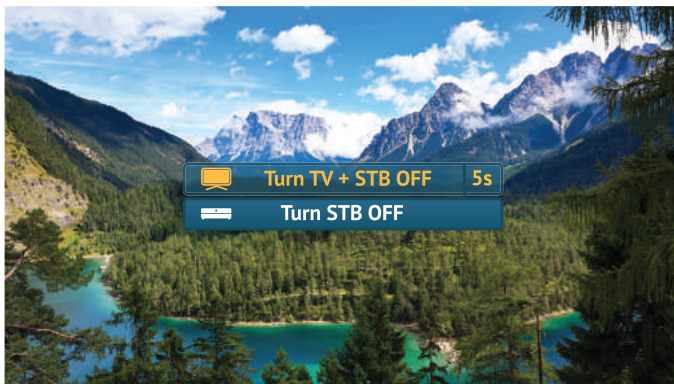

Button [icon] on STB remote control performs also turning TV and STB back on.

TV IN MOBILE, TABLET AND PC - JUICE TV ANYWHERE.

Juice TV Anywhere device provides TV channels watching on devices such as mobile, tablets or pc. Juice TV Anywhere connects to one of the available USB ports on STB.

As soon as Juice TV Anywhere device is detected, enter into STB menu - Settings/TV Anywhere and insert activation key you have received from your television service provider.

Select your own login details for next Juice TV Anywhere use. From this moment the device is active and ready to use. Watching of TV channels on mobile, tablet or pc is performed on web portal provided by your television service provider.
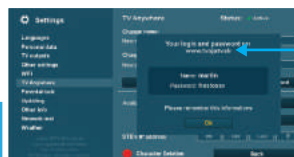

Displaying of available TV channels for Juice TV Anywhere use.

*   list of selected TV channels depends on your television service provider.
** Juice TV Anywhere device is not a part of STB pack and is necessary to obtain it from your television service provider.

Active Lock:
ON – Lock is ON 24/7
OFF – Lock is OFF 24/7
By Time – when you select this option, set in Open Lock Time period you want your lock OFF. Out of this time, the lock is ON

SETTINGS - PARENTAL LOCK - DESCRIPTION

Parental Lock:

The Parental Lock feature allows you to password protect channel or allow access to all menus. Password is created by entering any 10 figures (it might be less figures than 10 but 10 is maximum)

Create a password:

Go to: Menu / Settings / Parental Lock / Password for Settings and Parental lock. Leave Current password blank, Fill in New Password by entering maximum 10 figures password, then to confirm it fill it in again in New Password Again. Save it by pressing Set New Password. If you make a mistake while filling in, press red button on remote control to delete last entered figure.
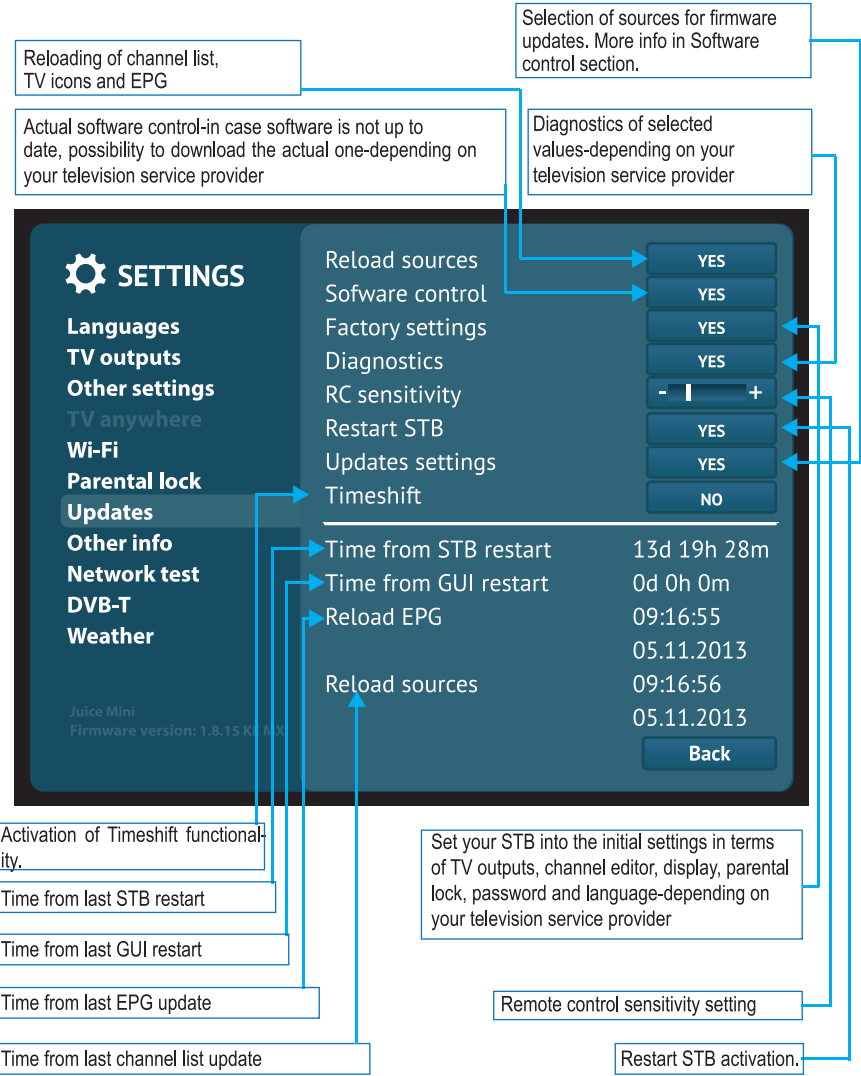

Change a password:

Go to: Menu – Settings / Parental Lock / Password for Settings and Parental lock. Into Current Password enter the password you are using at the moment. Into New Password write in a new password you would like to use. Confirm it by filling in the new password into New password again. Save it by pressing Set New Password.
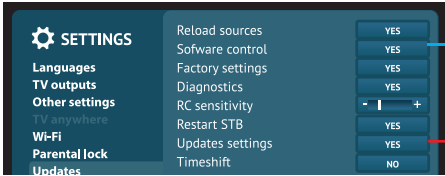

Delete a password:

Do it only when you want all your channels and Settings to be unlocked

Go to: Menu / Settings / Parental Lock / Password for Settings and Parental lock. Into Current Password enter the password you are using at the moment. Leave New Password and New Password again blank. Save it by pressing Set New Password.

*ARCHIVE – RECORDING THE PROGRAMS

1. Marking the programs for recording one by one (individually)

Activate Recording options by pressing the EPG button (Electronic Program Guide) on remote control. Use up/down/right/left arrows to navigate through program list in EPG window . The programs you want to record, mark them one by one (individually) by pressing the OK button on remote control. Next to the program name the red spot appears, symbolizing that program is ready for recording. Use the same OK button on remote control to unmark the program, the red spot disappears.

2. Marking the programs for recording as a group

Activate Recording options by pressing the EPG button (Electronic Program Guide) on remote control. Straight after that press red button on remote control and select one of the options:
- Record all programs for day DD.MM.YYYY
- Record all programs from now on
- Deactivate all recordings
- Deactivate all recordings for day DD.MM.YYYY

Confirm selected option by pressing the OK button on remote control.
Exit Recording options window by pressing red button on remote control.
Exit the EPG window by pressing EPG button on remote control or Menu button on remote control or Exit button on remote control.

RECORDING

1. Instant recording

By pressing the button on remote control, launch instant recording on external HDD, e.g. USB key or other types of external HDD.

Would you like to record "Addams family"?

OK   Cancel

The actual recording process symbolises blinking RED symbol in right top corner of TV screen and blinking RED diode on front panel of STB.

Hide blinking RED symbol symbolising recording by pressing the EXIT button on remote control. The EXIT button does not stop the RED diode blinking during recording process. Quick notice of ongoing recording appears on TV screen every 10 minutes automatically.
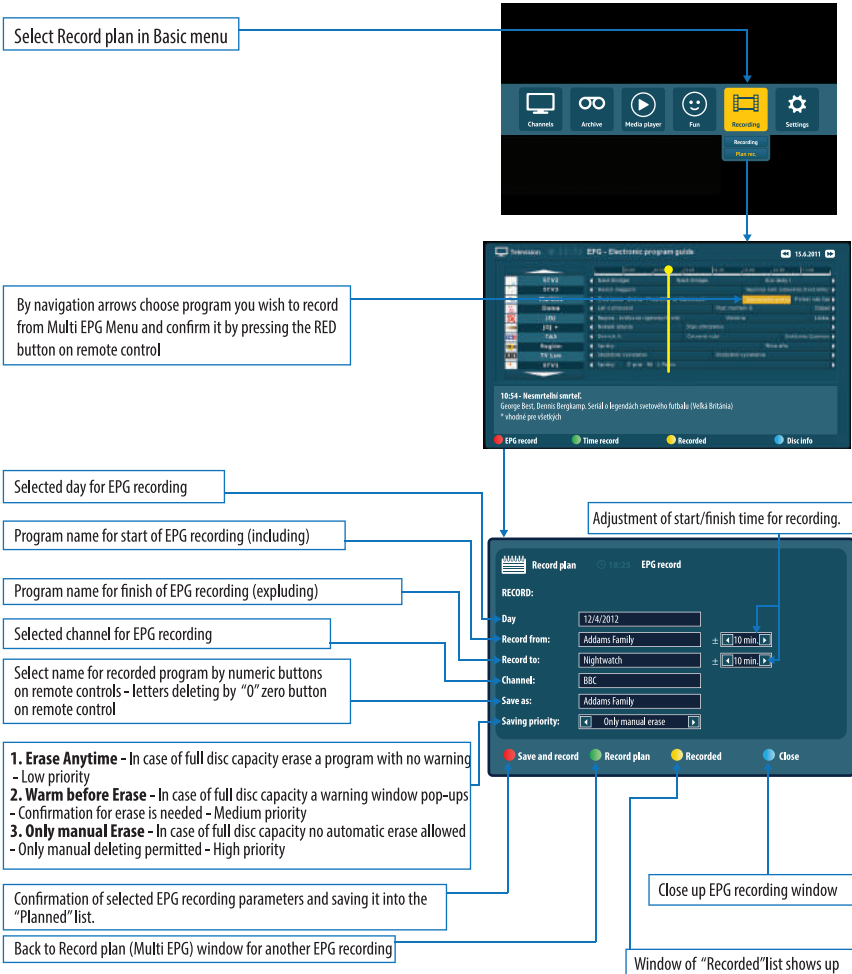

BBC – Addams Fam... ●

By pressing the button on remote control during instant recording deactivate the process of recording on external HDD.
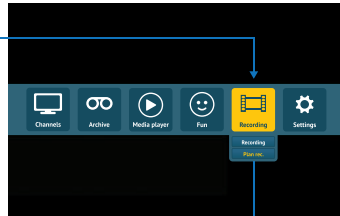

Would you like to stop recording of
"Addams family" ?

OK   Cancel

2. EPG recording

Recording based on EPG datas - Electronic Program Guide.

Select Record plan in Basic menu

By navigation arrows choose program you wish to record from Multi EPG Menu and confirm it by pressing the RED button on remote control

Selected day for EPG recording

Program name for start of EPG recording (including)

Program name for finish of EPG recording (expluding)

Selected channel for EPG recording

Select name for recorded program by numeric buttons on remote controls - letters deleting by "0" zero button on remote control

1. Erase Anytime - In case of full disc capacity erase a program with no warning - Low priority
2. Warm before Erase - In case of full disc capacity a warning window pop-ups - Confirmation for erase is needed - Medium priority
3. Only manual Erase - In case of full disc capacity no automatic erase allowed - Only manual deleting permitted - High priority

Confirmation of selected EPG recording parameters and saving it into the "Planned" list.

4. TimeShift recording

TimeShift functionality provides channel recording from the moment of switching onto the channel.
For TimeShift recording is necessary to use at least 8 GB USB device.

Amount of recorded content depends on the external USB device capacity.
It is necessary for TimeShift to:
A.
1. Set in Menu: Settings / About application / TimeShift / Yes
2. Connect external HDD device into the USB port of set-top box.
B.
1. Connect external HDD into one of the USB port of Set-top Box
2. Enter Disc info menu – Disc mode – Timeshifting
or Timeshift+Recording
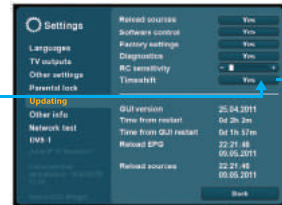

Timeshift disc preparation necessary. Please wait, it can takes a few minutes. During the proces do not manipulate with set-top box. Preparation status displayed right beneath.

Ok

3. Launch disc formatting following by Timeshift disc preparation (it can takes few minutes time to do that).

TimeShift player:

| Initial time of TimeShift record | Program name | Ongoing program time |

15:30   Addams Family   16:40

Play/pause

16:12

| Rewind | Forward | Re-play from the first moment of record | Stop |

Mutual setting of Timeshift recording and standard recording (Instant, Time, EPG, Periodical) at the same time, makes the standard recording preferred.

5. Recordings Management
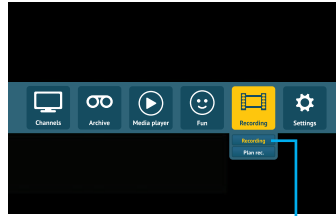

Status of external HDD devices:
1. Disc inserted and not recording "Disc occupation: 32% No recording..."
2. Disc inserted and recording: "Disc occupation: 32% Recording ..."
3. Disc not inserted: "No device found"

CONNECTING WiFi KEYBOARD TO SET-TOP BOX

Press 2 seconds
to turn the keyboard on.

MEDIA PORTAL*

It allows using of various media applications. Their offer depends on your television service provider.

Vast majority of media applications work only at full HD or HD ready resolution.
Their funcionality at analogue way of connecting (SCART, RCA) is not guaranteed!!!
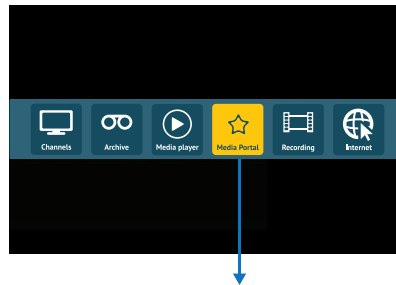

Button for previous application list

Button for next application list

Current page position from total number of pages

Genres selection by up-down arrows on remote control. Move to the application list by right arrow on remote control.

* depends on your television service provider.
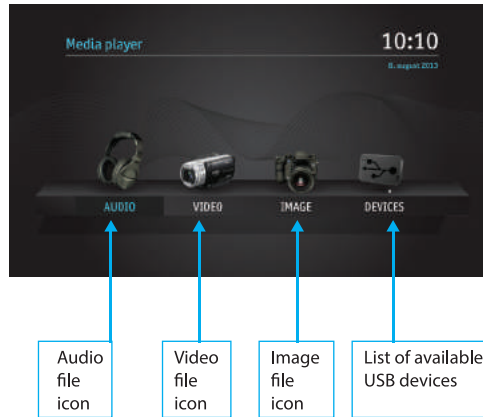

Links on famous or advertising web portals - depends on your television service provider.

MEDIA PLAYER

It provides playing of media files from external source.

1.Playing from USB device:

  a) USB device is connected to one of the USB ports of set-top box
  b) USB device has been detected by set-top box
  c) Select Media Player item in basic menu of set-top box to open graphic interface
     for playing of media files

| Audio file icon | Video file icon | Image file icon | List of available USB devices |

1. AUDIO files play:
   Supported format: mp3

| Just played song info. | | Song list. |

| Repeat One/All - Possibility to reeat one song on the album. Activated by RED button on remote control. | | Shuffle - random song selection. Activated by GREEN button on remote control. |

2. VIDEO files play:

Supported formats: .avi, .mkv, .mp4, .flv, .mov, 3gp, .divx
Video containers: ts, mpeg, msvideo
Subtitle formats: .srt, .txt, .sub

Selection of available subtitles by ☐ button on remote control

Selection of available audio tracks by ☐ button on remote control

Selection of aspect ratio by ☐ button on remote control

2. IMAGE files play:

Supported formats: .jpg, .png, .gif,.bmp, jpeg

Picture sequence

Picture rotation in 90°, 180° and 270°

Picture zoom 2x and 4x

Picture slideshow launch

Slideshow - selection of slideshow time interval
1s, 2s, 3s, 5s, 10s, 20s, 30s

Displayed picture info - name, size, resolution
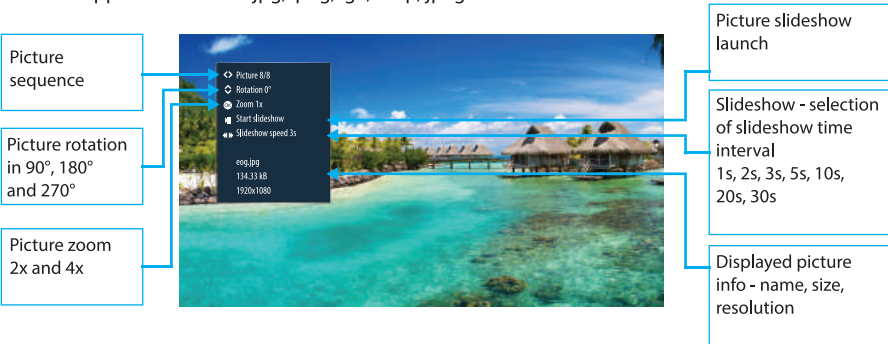

2. Network playing

a) install on PC or other multimedia device, you want to play media files from, DLNA server
   (for example www.serviio.org)
b) assign folders, you want to play media files from, under installed DLNA server
c) Select Media Player in basic menu of set-top box to open graphic interface for playing of media files
   - described above

For correct functionality of media files network playing via set-top box is necessary to connect set-top box and PC or other multimedia device within one LAN network!!!
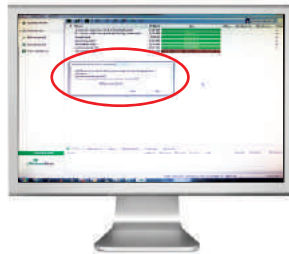

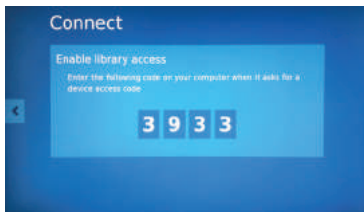

BitTorrent ™

It provides playing of media files from external source (PC, multimedia device) which have been downloaded by one of the BitTorrent™ clients.
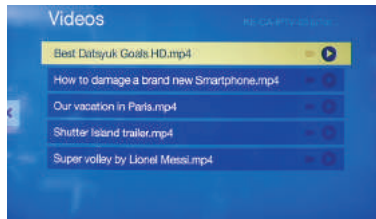

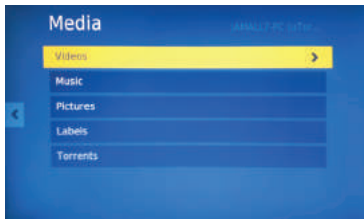

1. Select BitTorrent item in set-top box menu.
2. As long as a BitTorrent client is available, its name displays.
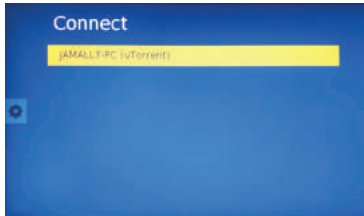

3. To interconnect between set-top box and bitTorrent client is necessary to input 4-digits code displayed on TV, directly onto bitTorrent client interface on PC.

4. Selection of required file for playing.

For correct functionality of bitTorrent media files network playing via set-top box is necessary to connect set-top box and PC or other multimedia device within one LAN network!!!

Antik Technology does not have or accept any liability for any media file acquired by whichever bitTorrent client!!!
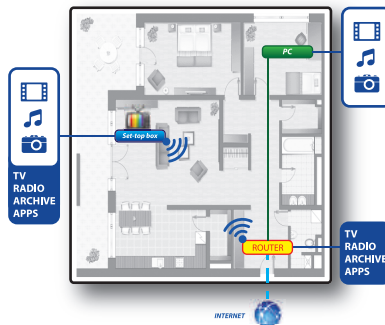

Wi-Fi ADAPTOR USE

Wi-Fi adaptor*, as external device is used for non-cable distribution of television and other media datas. Set-top box supports wi-fi adaptor devices containing chipset RTL8188CUS and RTL8192CU (it is recomended to use Juice Wi-Fi dongle or Juice TV Home Connector).

Wi-Fi adaptor is used for the purpose of:

A. within own network of your television service provider - distribution of audio, video and image datas within one local home network (supports distribution of media datas via DLNA protocol and BitTorrent files playing)

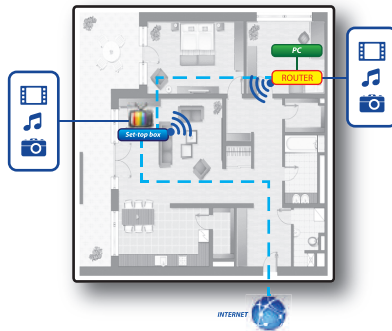

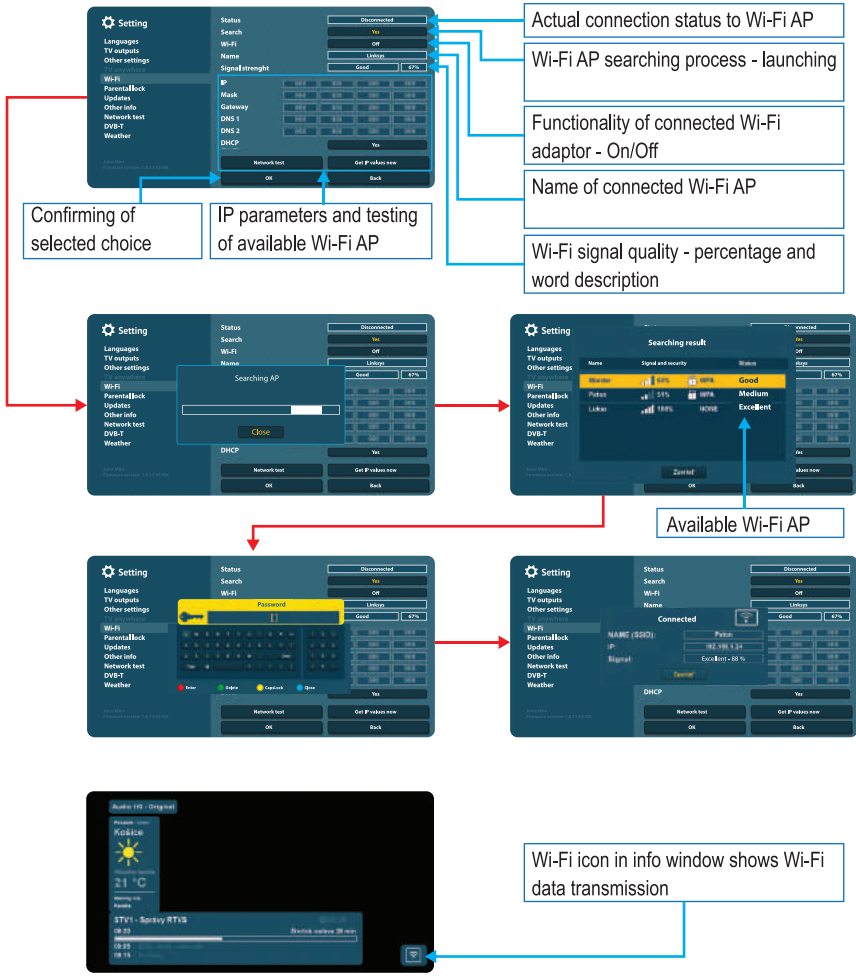

B. out of your television service providers network - distribution of television and radio datas plus distribution of audio, video and image datas within one local home network (sports, distribution of media datas via DLNA protocol and BitTorrent files playing)

* is not a part of set-top box pack

After Wi-Fi adaptor detection, select in basic menu of Set-top box - Settings - Wi-Fi. Launch searching of available Wi-Fi AP (AP-access point).

Actual connection status to Wi-Fi AP

Wi-Fi AP searching process - launching

Functionality of connected Wi-Fi adaptor - On/Off

Name of connected Wi-Fi AP

Wi-Fi signal quality - percentage and word description

FREQUENTLY ASKED QUESTIONS (FAQ)

Before you contact your provider regarding any troubles with you set-top box, check these Frequently Asked Questions. You might find you answer right here.

TROUBLE	HELP AND ADVICE
*Set-top box`s display is OFF	- internet cable is disconnected - you might have set Menu/Settings/Other Settings/Standby display/Black Display where set-top box`s display is unlit on purpose
Picture on the screen is OK but there is no sound	- double check Menu/Settings/TV Outputs – if all selected options are in compliance with connection of set-top box to your TV (depending on type of your TV) - check the connection of *SCART cable (if you are connected via SCART cable) - volume is down or MUTE button on remote control of set-top box or TV is pressed
No picture	- incorrect setting of TV Outputs on set-top box. Use front panel of set-top box to correct it. Press M button on front panel and use up/down arrow to select the correct type of connection of set-top box to your TV. Confirm it by pressing the OK button on *front panel – set-top box will restart. - incorrect setting of TV Outputs on your TV (depending on type of your TV).
Channel list is empty	- channel list is downloaded automatically once per 24 hours or by unplugging of set-top box from mains lead and plugging it in straight after - double check if set-top box is connected to internet network - it could be causing by connection of a router between set-top box and internet cable – it is necessary to connect internet cable into set-top box directly
No response to remote control	- no remote control batteries in or remote control batteries exhausted - front panel obstructed
Picture freezes	– try to switch to another channel or restart set-top box by unplugging/plugging in from/to mains lead
Square blocks picture	- check if internet cable was not for some reason interrupted or damaged - restart set-top box
*Black&White picture at SCART connection	- check Menu/Settings/TV Outputs/Type of connection. Select SCART CVBS or SCART S-video (depending on type of your TV)
Quality of Picture is not satisfactory	- check if Menu/Settings/TV Outputs are correctly set (depending on type of your TV)
Everything seems to be set correctly, but there are no channels in Channel list	– it could be causing by connection of a router between set-top box and internet cable – it is necessary to connect internet cable into set-top box directly - check if diode on WAN port is lit (if it is not, disconnect/connect internet cable)

*only on selected models
